SOLUTIONS WITHOUT BORDERS

## Web Service

Delegata offers integrated and reusable technologies that leverage the power of the Internet.

### Description

The Web enables government agencies to accomplish more tasks using fewer resources. Organizations sometimes struggle to connect enterprise systems, applications, and people while providing the flexibility needed to meet the constant flow of change. Yet most applications do not properly communicate with each other and data gets locked away in rigid, incompatible systems. Companies need an infrastructure solution that easily opens the door to the constrained data and rapidly adapts to changing market conditions.

## The Solution

Delegata's Web Services solutions offer integrated and reusable technologies that leverage the Internet to simultaneously connect multiple applications. Java 2 Platform, Enterprise Edition (J2EE) and Microsoft .NET technologies provide the tools to build and use Web Services to deliver information to customers, businesses, and employees. These Web Services help to streamline communications, reduce costs and improve productivity.

Activity Description	Sample Deliverables
Business Case Justification	<ul style="list-style-type: none"> <li>▪ ROI Models</li> <li>▪ Quantification Templates</li> <li>▪ Recommendations</li> <li>▪ Implementation Strategy</li> <li>▪ Risk Mitigation Strategy</li> <li>▪ Business Impact Analysis Document</li> </ul>
Web Services Readiness Assessment	<ul style="list-style-type: none"> <li>▪ Survey Instrument</li> <li>▪ Evaluation Matrix</li> <li>▪ Application Architecture Analysis Matrix</li> <li>▪ Vendor Analysis and Fit Templates</li> <li>▪ Gap Analysis and Recommendations</li> </ul>
Web Services Deployment	<ul style="list-style-type: none"> <li>▪ Application Analysis</li> <li>▪ Technical Requirements</li> <li>▪ Design Specifications</li> <li>▪ Build Components</li> <li>▪ Knowledge Transfer Plan</li> <li>▪ Change Management Plan</li> <li>▪ Rollout Plan</li> </ul>

## The Benefits

Benefit	Explanation
Speed	Through the implementation of structured solutions.
Risk Reduction	Through the application of a proven methodology, industry best practices, and a robust technical architecture for integration.
Cost Reduction	Through the significant reduction in development time and scope.
Value	By having the ROI model guide the implementation to achieve specific benefits.
Employee Productivity	By enabling streamlined business processes through service-oriented architecture.
Tighter Application Integration	Through a unified Web servicing approach to application deployment and service integration.
